

# A HISTORY OF GLIDERS AND AIRCRAFT OWNED AND OPERATED BY CAMBRIDGE UNIVERSITY GLIDING CLUB AND CAMBRIDGE GLIDING CLUB

This history of the CUGC/CGC fleet was initially drafted using club news provided to various gliding magazines, together with other data sources including Richard Cawsey's glider production lists, information from the Gliding Heritage Centre, articles from Scale Soaring UK and the G-INFO CAA Aircraft Register, and for more recent years, the BGA National Ladder. The CUGC "Notable Flights" book has provided a wealth of information in the first thirty years of the club. Additional information will be added as the archive is populated with digital versions of the CUGC & CGC committee minutes, CUGC Trust Ltd minutes and CUGC & CGC club newsletters.

**The plan is to create a complete set of photographs on display in the clubhouse. The photographs in this draft are not especially high quality and any better photographs would be very welcome.**

This history is part of a project to record and maintain the history of CUGC and CGC. For further information please contact Iain Baker.
